

Install a Low-Flow Showerhead and Faucet Aerators

Notes for organizers:

- Consider making a bulk purchase of low-flow showerheads at a discount. Team up with neighboring congregations for more buying power.
- Challenge people to come up with creative ways to reduce water usage even in the summer, when consumption tends to be highest. Post photos, ideas, success stories and questions on a bulletin board.
- Arrange for a speaker from a utility board to give a talk on your community's water situation.
- Water has symbolic as well as literal importance in many faith traditions. Challenge your congregation to see "every day" water as sacred, and to treat it as such.
- Suggested items to display at information table:
 - Low-flow showerheads
 - Faucet aerators
 - Shower timers
