

Join with your congregation in this
12-Month Action Program to cut your household energy use.

Task of the Month

Cut "phantom" electricity loads.

Each month, participating congregations focus on one simple but meaningful action, and help all their members get it done.

At the end of the year, those who have completed the actions should be enjoying lower utility bills.

- Enable power management features on all computers
- Turn your computer completely off when not in use
- When not in use, unplug portable stereos, bread and coffee makers, cell phone chargers, dust busters, and electric toothbrushes, etc.
- Plug entertainment system components into a power strip that can be switched off when not in use (eliminating the need to unplug individual components).

Cost: \$0

Estimated Savings: \$25/yr

Difficulty: Easy
